**DETAILED ACTION**

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-26 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-28 of copending Application No. 10/554,765. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims and the referenced claims are directed to the same luminescent core-shell

Art Unit: 1794

nanoparticles. The luminescent core of metal salt as featured in the instant claims is encompassed by the broad metal salt core described in the referenced claims and the metal salt shell of the instant claims includes the luminescent metal salt shell described in the referenced claims.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Claim Rejections - 35 USC § 103***

4. Claims 1-21 and 23-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combined teaching of the German patent DE 101 31 173 ("DE'173") and the Japanese patent 01-318,078 ("JP'078").\*

Claims 1 and 2: DE'173 teaches a core-shell nanoparticle wherein the core comprises a luminescent nanoparticle of metal See DE'173, paragraph [0013]. However, DE'173 does not explicitly report particular materials for the core and shell as claimed. JP'078 teaches luminescent nanoparticles wherein the core comprises a phosphate and the shell consists of a LaPO<sub>4</sub> activated by cerium and terbium. Therefore, one of ordinary skill in the art would have found it obvious to utilize the materials suggested by JP'078 in the luminescent nanoparticles taught by DE'173 because these materials serve the purpose (providing luminescence) sought by DE'173.

\* Copy of DE'173 has been provided by Applicant.

***Response to Arguments***

5. Applicant's arguments with respect to claims 1-21 and 23-26 have been considered but are moot in view of the new ground of rejection set forth in section 4 above.
